

System Level Tests

System tests check that the software functions properly from end-to-end.

System level test for my calculating app I am developing.

Function tested	What's expected	Test with right or wrong	Result pass or fail
Add number	I am expecting a correct addition answer.	Test was right.	Pass
Multiply number	I am expecting a correct multiplication answer.	Test was wrong. Multiplication function not found	Fail
Subtract number	I am expecting a correct subtraction answer.	Test was right.	Pass
Divide number	I am expecting a correct division answer.	Test was wrong. division function not found	Fail
